SAN ELIJO JOINT POWERS AUTHORITY

RECOMMENDED ANNUAL BUDGET

2024-2025

SAN ELIJO JOINT POWERS AUTHORITY

Celebrating 59 years of service

Creating lasting water solutions for our communities & environment

Delivering responsible & reliable service

Promoting opportunities for our communities

Mission

To serve our communities by providing safe and reliable recycled water and wastewater services in order to protect the environment and public health.

Vision

We pursue innovative practices to produce clean water in an environmentally, socially, and fiscally responsible manner.

As an organization, the San Elijo Joint Powers Authority values:

HUMAN VALUE	PUBLIC TRUST	SAFELY VALUE				LOYALTY
Provide equal opportunity for all employees to succeed and grow professionally and personally.	Honor and promote public confidence through transparency, personal character, and the highest level of professional behavior.	safety workers	and the of co- and the without	Provide supe service to th community i safe, reliable, cost-effecti manner.	he n a and	Faithfully and reliably promote the best interests of the agency and fellow employees.

TRANSMITTAL LETTER

Honorable Chairperson and Members of the Board of Directors:

I am pleased to present SEJPA's FY 2024-25 Recommended Budget. Our focus remains on delivering high-quality service and environmental protection through innovation, collaboration, and fiscal responsibility. With successful partnerships, teamwork, and staff development as our foundation, we are well positioned to continued building a sustainable future for our communities.

Working Toward a Sustainable Future. As we strive for a sustainable future, our capital program is focused on replacing aging assets, maintaining infrastructure reliability, and improving system performance. The San Elijo Water Campus creates approximately 25% of its electrical power via photovoltaic solar and produces more than 500 million gallons of recycled water annually for irrigation and industrial uses within north coastal San Diego County.

Exceptional Water Treatment. We are committed to delivering exceptional water quality. Monitoring studies show our average removal rate for both Carbonaceous Biochemical Oxygen Demand (CBOD) and Total Suspended Solids (TSS) was an impressive 98.5% in 2022 and 2023. Our performance track record is a testament to our unwavering dedication to protecting the environment and public health.

Achieving Highest Levels of Safety. We take pride in developing and leading a safe work environment. We utilize in-person and web-based training, low-frequency/high risk activity reviews, site safety inspections, and other learning formats to increase knowledge and improve safety behaviors. The results have been impressive as our staff has not missed a single work-day due to injury over the last 24 years. Our commitment to safety has kept our workforce safe and productive, helped us avoid injury and property damage claims. It also has earned positive newspaper headlines, formal recognitions from the California Sanitation Risk Management Authority (CSRMA) and the California Water Environment Association (CWEA).

Investing in Our Community and Workforce. We are committed to preparing the next generation of water leaders through our internship program, which has fostered valuable partnerships with local universities and community colleges. We have hosted 31 interns over the last four years, and we are proud to have filled seven permanent positions through this program during this period.

Building Valuable Partnerships. SEJPA strives to be a model of inter-agency cooperation. Our culture of collaboration improves cost effectiveness, expands innovative practices, and increases the benefits we provide to the region. Currently, the North San Diego Water Reuse Coalition is spearheading a grant effort worth \$18.3 million to promote the expansion of recycled water use in North County. As part of this funding, SEJPA will receive approximately \$3.8 million, specifically aimed at expanding the use of stormwater and recycled water as local water supplies. We are excited to be part of this collaborative effort and look forward to contributing to the region's sustainable water management practices.

OPERATING BUDGET OVERVIEW

The SEJPA recommended budget for FY 2024-25 comprises 12 operational programs that are managed and operated by SEJPA. We continually seek opportunities to improve our services and to apply science, technology, and engineering to maximize value to the communities we serve.

For FY 2024-25, the total increase in Operating Costs year-over-year is \$546,819, or 5.5%. This increase primarily stems from an overall, higher-than-normal inflationary trend affecting most budget categories. Specifically, areas such as labor, insurance, and certain chemicals and service contracts have increased notably

Program		Adopted Budget 2023-24	Re	commended Budget 2024-25	 Budget Change	% Change
Wastewater Treatment	\$	3,963,797	\$	4,306,992	\$ 343,195	8.7%
Laboratory Services		955,076		1,050,738	95,662	10.0%
Ocean Outfall		1,031,231		1,070,306	39,075	3.8%
Cardiff Sanitary Division Pump Stations		376,169		405,554	29,385	7.8%
Encinitas Sanitary Division Pump Station		167,777		185,448	17,671	10.5%
City of Encinitas Urban and Stormwater Services		55,514		61,804	6,290	11.3%
City of Solana Beach Pump Stations		463,275		512,798	49,524	10.7%
City of Solana Beach Generator Maintenance Services		15,507		17,556	2,050	13.2%
City of Del Mar Pump Station		66,392		75,981	9,589	14.4%
22nd District Agricultural Association (Del Mar Fairgrounds)		136,953		172,371	35,417	25.9%
Leucadia WD Technical Support Services		22,800		28,209	5,409	23.7%
	\$	7,254,492	\$	7,887,757	\$ 633,265	8.7%
Recycled Water		2,720,132		2,633,685	(86,447)	-3.2%
Total Operating Expenses	\$	9,974,623	\$	10,521,442	\$ 546,819	5.5%

CAPITAL BUDGET OVERVIEW

The Capital Improvement Program (CIP) is prioritized to achieve environmental stewardship, permit compliance, investments in our local community, safe and reliable facilities, and sustainable resource management. During the past eight years, SEJPA's Capital Program has averaged approximately \$5 million per year. Our capital infrastructure priorities for FY 2024-25 include implementation of six multi-year

PRIORITIZED CAPITAL PROJECTS, 3-YR PLAN	ES	STIMA	TED COST
Phase 3	\$	12.1	Million
Biosolids Dewatering Facility Improvements			
& MS-2 Replacement			
Phase 4	\$	18.1	Million
Wanket Reservoir Refurbishment			
Wanket Connecting Pipeline	_		
Stormwater Capture, Reuse and Site WQ	_		
Biological Treatment Improvements	-		
Moonlight Beach Pump Station Modifications	-		
Misc. Projects	\$	2.4	Million
TOTAL	\$	32.6	Million

capital improvement projects and a backlog of smaller miscellaneous upgrades at the Water Campus and remote facilities with an estimated capital cost of \$32.6 million (see summary chart right).

Costs for capital projects are allocated to customer agencies based on infrastructure benefits and in accordance with capacity share owned/leased. Funding sources include annual budgeted capital program contributions for shared facilities and for special projects, recycled water revenues and incentives, financing through bonds and loans, and by state and federal grants. The FY 2024-25 budget includes \$1.9 million in capital program contributions. Notably, SEJPA has been awarded multiple grants totaling up to approximately \$6 million through the Integrated Regional Water Management (IRWM) program under Proposition 1 (California Water Bond) and from the US Bureau of Reclamation Title XVI Program to fund specific, eligible.

SEJPA will commence an update to its Facility Plan in FY 2024-25 with an emphasis on asset management and resiliency to changing climate. SEJPA and its customer agencies have agreed to include the Water Campus and select remote facilities in this planning effort. The resulting plan will be the foundation for SEJPA's capital program over the next 10 years.

DEBT SERVICE

Debt service for FY 2024-25 is projected at \$2,373,604, which is similar to that of the prior year. This debt service is shared by the Wastewater Program at \$1,391,963 and Recycled Water Program at \$981,641. No new debt is anticipated to be initiated in FY 2024-25.

A VISION FOR THE FUTURE

Our goal is to deliver excellent service, build trust with our customers and the community, and maximize opportunities to increase local sustainability, while developing and inspiring our employees. We are grateful for the support of our Board, staff, and community members, without whom none of our achievements would be possible. Looking ahead, we will continue to prioritize sustainability and explore new ways to advance environmental stewardship and social responsibility in our operations.

Your San Elijo Joint Powers Authority team is pleased to present the FY 2024-25 Recommended budget.

Respectfully submitted,

1. The

Michael T. Thornton, P.E. General Manager

RESOLUTION NO. 2024-01

RESOLUTION APPROVING THE SAN ELIJO JOINT POWERS AUTHORITY OPERATING AND CAPITAL IMPROVEMENT BUDGETS FOR FISCAL YEAR 2024-25

WHEREAS, the San Elijo Joint Powers Authority (SEJPA) General Manager has submitted for the consideration of the SEJPA Board of Directors proposed SEJPA Operating and Capital Projects Budgets for Fiscal Year 2024-25;

NOW, THEREFORE, THE BOARD OF DIRECTORS OF THE SAN ELIJO JOINT POWERS AUTHORITY HEREBY RESOLVES AS FOLLOWS:

3. The Board of Directors has reviewed the Recommended Operating Budgets and Capital Projects Budget, and the funds included herein for the period of July 1, 2024 through June 30, 2025 and hereby finds that such budgets, as reviewed, are sound plans for the financing of required SEJPA operations and capital improvements during Fiscal Year 2024-25. Such budgets are hereby adopted.

San Elijo JPA Operations and Maintenance Fund	\$ 9,279,720
San Elijo JPA Water Reclamation Operating Fund	3,615,326
San Elijo JPA Capital Projects Fund	3,666,000
Total	\$ 16,561,046

- 2. The Board of Directors authorizes carrying forward unexpended capital project appropriations and encumbered operating funds for the Fiscal Year 2024-25.
- 3. The Board of Directors authorizes the SEJPA Treasurer to deposit any surplus FY 2024-25 budgeted funds, meaning appropriated funds that are not expended or otherwise encumbered by June 30, 2024, into the SEJPA PARS Public Agencies Post-Employments Benefits Trust Program.

PASSED AND ADOPTED this 18th day of June 2024, by the following vote:

AYES: Board members:

NOES: Board members:

ABSENT: Board members:

ABSTAIN: Board members:

OUR HISTORY AT A GLANCE

Up to the early 1950s, Solana Beach and Cardiff-by-the-Sea relied on privately-owned septic systems for wastewater treatment and disposal. As the communities grew, the Cardiff Sanitation District and the Solana Beach Sanitation District formed to collect, treat, and dispose of wastewater. The districts built independent facilities in the San Elijo Lagoon to provide basic treatment before discharging the effluent directly into the lagoon. Within a decade, authorities determined that water quality in the lagoon was deteriorating, and that treatment needed. In 1963, Cardiff Sanitation District and Solana Beach Sanitation District joined hands to form what is now the San Elijo Joint Powers Authority (SEJPA). Established under state law to protect public health and the environment, in 1965 the newly-formed entity built the San Elijo water pollution control facility and a 4,000-foot-long ocean outfall.

Since then, SEJPA has evolved, adding ocean disposal services to the City of Escondido (1974) and increasing the outfall length to 1.5 miles offshore, building new treatment (1991) to comply with the Clean Water Act, constructing water recycling infrastructure (2000), adding microfiltration and reverse osmosis treatment (2013) to enhance recycled water quality, providing wastewater treatment to the City of Del Mar (2017), adding clean water services for 22nd District Agricultural Association (2022), and providing operational support services to Leucadia Wastewater District (2022).

The San Elijo Joint Powers Authority has come a long way in its service to the local communities and its mission to protect the water environment through a host of clean water programs. Today, our focus is on high quality and reliable water treatment and recycling to produce a sustainable future for the communities we serve.

SHARING OUR WATER STORY

We love to share our story. During Water Campus tours, students and teachers see the treatment process for wastewater and water recycling. In a typical year, we welcome more than 900 local students and teachers to the campus. To accommodate distance-learning, we produced a virtual tour to expand our water education outreach.

INDUSTRY LEADERSHIP

In 2024, the San Elijo Joint Powers Authority was recognized by both the California Water Environment Association and the California Sanitation Risk Management Association for its leadership in promoting safe work practices within the industry. Building on our legacy of excellence, our agency has consistently received accolades for innovative treatment applications, efficient utility operations, and exceptional treatment performance in past years. We believe that fostering collaboration and knowledge sharing with our peers is integral to achieving sustained success.

CELEBRATING ACCOMPLISHMENTS

We are proud to support the professional development of our employees. Recent accomplishments include:

CERTIFICATIONS

Devin McGinness Wastewater Treatment Plant Operator Grade 3 Associate of Arts in Wastewater Technology

Nina Holtz Wastewater Treatment Plant Operator Grade 3

Ritwik Bandyopahdyay Wastewater Treatment Plant Operator Grade 1

David Canady Operator In Training (OIT)

Evan Fox Operator In Training (OIT)

Jeffery Valdes Operator In Training (OIT)

Brandon Moss CWEA Laboratory Analyst Grade 1

FUND SUMMARY

The SEJPA budget includes five Fund categories: Wastewater Services, Wastewater Capital Projects, Recycled Water Services and Capital Projects, and PARS Trust which are presented below.

Wastewater Services Fund supports operating and debt services expenses in the Wastewater Treatment, Laboratory Services, Ocean Outfall, Pump Station Operations, and other services programs. Capital expenses for these programs are accounted for under the Wastewater Capital Projects Fund.

Wastewater Capital Projects Fund supports pay-as-you go projects for all projects under Wastewater Services programs. FY 2024-25 capital revenue budget of \$1,938,000 includes \$1,265,000 for Wastewater Treatment projects, \$146,000 for Ocean Outfall projects, \$147,000 for Laboratory projects, and \$380,000 for Pump Station Projects. Refer to the Capital Programs section for details.

Recycled Water Services & Capital Project Fund supports operating, capital, and debt services expenses in the Recycled Water program. FY 2024-25 capital appropriations budget includes \$1,728,000, which will be combined with previous appropriations to fund improvements to treatment system enhancements, valve maintenance and replacements, refurbishment of existing storage tanks or the construction of new storage, replacing existing distribution system pumps and motors, stormwater recycling, and ongoing system asset management. The \$10 million debt revenue is the private placement loan for the above-mentioned projects to smooth cashflow requirements.

The PARS Trust Fund accounts for an irrevocable Section 115 Trust established to serve as a pension rate stabilization program, facilitating the prefunding of employee benefit plan obligations. However, due to the notable escalation in the personnel budget, primarily attributed to the tightening labor market conditions, a contribution to the PARS Trust is not slated for allocation in the FY 2024-25 budget cycle.

REVENUE SUMMARY

BASIS FOR REVENUE BY SOURCE

SEJPA's revenue is based on cost of service and miscellaneous revenue sources. Influent and effluent flow percentages are used to estimate the operating and maintenance costs charged to each member and leasing agency. Capacity percentages are used to estimate capital costs charged to each member and leasing agency.

- Influent flow is the basis for Wastewater and Laboratory Services costs.
- Effluent flow is the basis for the Ocean Outfall costs.
- Capacity is the basis for capital appropriations and debt services.

Below is a table of the 3-year average daily influent, effluent, and owned/leased capacity data for each member and leasing agency:

Millions of Gallons Per Day (MGD)										
Entity	Infl	uent	Efflu	ent	Treat	ewater ment acity	Outfall C	apacity		
City of Encinitas	1.223	45.9%	0.574	5.4%	2.200	41.9%	2.250	8.8%		
City of Solana Beach	0.927	34.8%	0.422	4.0%	2.200	41.9%	2.250	8.8%		
Rancho Santa Fe CSD	0.153	5.7%	0.072	0.7%	0.250	4.8%	0.250	1.0%		
City of Del Mar	0.364	13.7%	0.161	1.5%	0.600	11.4%	0.600	2.4%		
City of Escondido	-	0.0%	9.328	88.4%	-	0.0%	20.150	79.0%		
Total	2.667	100.0%	10.557	100.0%	5.250	100.0%	25.500	100.0%		

The Laboratory Services program provides analytical services to:

- Fairbanks Ranch Community Service District (CSD)
- Rancho Santa Fe CSD
- Santa Fe Valley CSD
- Whispering Palms CSD
- San Ysidro Border Facility

The FY 2024-25 recommended budget is based on historic service levels. The analytical service revenues may vary based upon the actual number of samples analyzed for our customers.

The Recycled Water program receives revenue from different customers with varying levels of service. In May 2021, the Board accepted the 2021 Recycled Water Cost-of-Service Study and approved recycled water rates for five fiscal years from FY 2021-22 to FY 2025-26. The planned rate increase for FY 2024-25 is 3.9% that will go into effect on July 1, 2024. The Recycled Water program also receives incentives in the amount of \$250 per acre-foot (AF) from the Metropolitan Water District of Southern California (MWD) and \$200 per AF from the San Diego County Water Authority (SDCWA).

FY 2023-24 ESTIMATED ACTUAL REVENUE

The estimated revenue for FY 2023-24 is projected to be \$14,459,494, which is \$86,284 or 0.6% more revenue than anticipated.

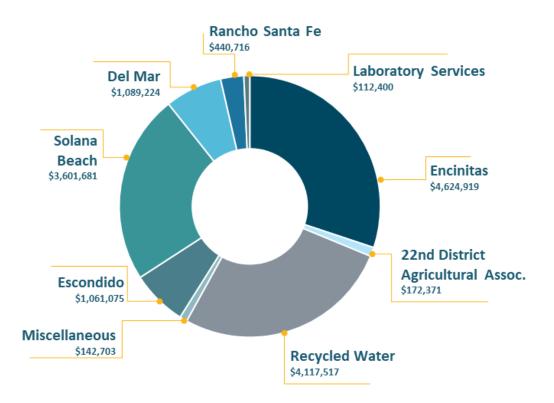

FY 2024-25 RECOMMENDED REVENUE BUDGET

The FY 2024-25 recommended budget includes a total revenue forecast of \$15,362,626, which is \$989,416 or 6.9% increase from the prior fiscal year. Key contributors to year-over-year budget changes include:

- Increased labor costs of approximately 13% across all programs, which is attributed to the tightening labor market conditions and staffing adjustments.
- The pattern of intense storm action associated with climate change has resulted in higher resource needs to respond.
- In the marketplace, insurance premiums have increased substantially. So have costs for supplies and services.
- Increases to Solana Beach Pump Stations' budgets to reflect cost increases for odor-control chemicals and SDG&E utility costs.
- Increase Laboratory Services budget to reflect increased costs associated with outside laboratory services.
- Increase to Cardiff Pump Stations budget to include capital project to replace the wet well inlet side gate at Olivenhain Pump Station.
- Increase in capital expenses across several programs to capture the expense of developing the 2025 Facility Plan update, which will outline capital needs for the next decade.
- Scheduled 3.9% recycled water rate increase effective July 1, 2024.
- Scheduled increase in recycled water purchase volume by the Encinitas Ranch Golf Authority.

Below is a summary of revenue sources shown in both table and chart format to illustrate the revenue diversity among the agencies we serve.

Revenue Source	Actua 2021-2		Estimated Actual 2023-24	Adopted Budget 2023-24	Recommended Budget 2024-25

PROMOTING SUSTAINABILITY

As California faces cyclical droughts, local supplies of recycled water are more important than ever. In Cardiff, Ada Harris Elementary School saves money and conserves natural resources by using recycled water.

OPERATING EXPENSE SUMMARY

SEJPA owns and operates the San Elijo Water Campus, San Elijo Recycled Water Utility, and is a co-owner of the San Elijo Ocean Outfall. SEJPA also manages several related service programs to support the cities of Encinitas, Solana Beach, and Del Mar, as well as other local government agencies. Operational programs include:

- Wastewater Treatment
- Laboratory Services
- Ocean Outfall
- Cardiff Sanitary Division Pump Stations
- Encinitas Sanitary Division Pump Station
- City of Encinitas Urban & Stormwater Services
- City of Solana Beach Pump Stations
- City of Solana Beach Generator Services
- City of Del Mar Pump Station
- 22nd District Agricultural Association (Del Mar Fairgrounds)
- Leucadia Wastewater District (LWD) Technical Support Services
- Recycled Water

In providing these services, SEJPA seeks to accomplish its mission in an environmentally, socially, and fiscally responsible manner. Except for the Recycled Water program, each of the above programs is funded by the customer base that is served and cost allocations are applied based on actual flows treated or level of effort provided. The Recycled Water Program is funded by water sales, grants, and incentive programs.

STAFF ALLOCATION

Budgeting for staff time is based on estimates of actual time required by each program. Below is a table showing the anticipated percentages of direct labor for each program in FY 2024-25.

Program	Recommended Staffing Allocation for FY 2024-25
Wastewater Treatment	32.5%
Labooratory Services	16.6%
Ocean Outfall	11.2%
Cardiff Sanitary Division Pump Stations	3.6%
Encinitas Sanitary Division Pump Station	1.7%
City of Encinitas Urban & Stormwater Services	0.7%
City of Solana Beach Pump Stations	4.7%
Solana Beach Generator Services	0.3%
City of Del Mar Pump Station	0.9%
Del Mar Fairgrounds	2.5%
Leucadia WD Technical Support Services	0.4%
Recycled Water	17.9%
Capital Programs	7.1%
Total	100.0%

FY 2023-24 ESTIMATED ACTUAL EXPENSE – ALL PROGRAMS

Total expenses including operating, capital, and debt service are estimated to end the fiscal year under budget by \$2,632,945 or 13.9%. By program, nine out of 12 programs are anticipated to be under budget. Operating expenses are estimated to end the year under budget at \$540,029 or 5.4%. Capital expenses are estimated to be on budget. Debt services actual expenses are anticipated to end the year slightly below budget by \$17,916 or 0.75%.

FY 2024-25 RECOMMENDED BUDGET – ALL PROGRAMS

Total FY 2024-25 recommended budget is \$16,561,046 including \$10,521,442 operating budget, \$3,666,000 capital appropriations, and \$2,373,604 debt service. The operating budget has increased by \$546,819 or 5.5% from the prior year. The capital appropriations are for projects listed in the Capital Program section of this budget book. The debt service budget will remain relatively similar to the prior year's budget.

BUILDING PARTNERSHIPS

Good neighbors make good partners. Across from the Water Campus, the Nature Collective and the County of San Diego manage the 800-acre San Elijo Lagoon Ecological Reserve. We share their commitment to protect the lagoon and ocean environments and are proud to be their partner in conservation and education.

OPERATING EXPENSE BY PROGRAM

WASTEWATER TREATMENT

PROGRAM DESCRIPTION

Wastewater Treatment is the primary cost center for operation and maintenance activities at the San Elijo Water Campus. Activities currently include full secondary wastewater treatment for the cities of Encinitas, Solana Beach, and Del Mar, as well as the Rancho Santa Fe Community Services District, with the effluent being recycled or disposed to the ocean. Wastewater biosolids are treated and dewatered, then hauled by contractor to a privatelyoperated land application site in Arizona for beneficial reuse.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

Actual operating expenses for the Wastewater Treatment program are expected to be under budget by \$77,174 or 1.9%. Personnel is over budget by \$9,571 or 0.6%. Supplies and Services is under budget by \$11,506 or 0.5%, due to higher than anticipated chemical costs. Capital Outlay is anticipated to be slightly over budget by the end of the fiscal year by \$762 or 2.2%.

FY 2024-25 RECOMMENDED EXPENSE BUDGET

Total FY 2024-25 recommended budget is \$6,963,955 including \$4,306,992 operating budget, \$1,265,000 capital appropriations, and \$1,391,963 debt service. The operating budget is \$343,195 or 8.7% above the prior year's budget. Personnel expenses are planned to increase by \$226,495 or 13.3% to reflect inflation to personnel and current work demands. Supplies and Services is to increase by \$151,700 or 7.0% to reflect general cost inflation and high percentage increases in certain chemicals, biosolids hauling and recycling, sediment disposal, and repair parts. Capital Outlay expenses have been moved to the capital program section this fiscal year. The Contingency budget is set at \$76,000 which is 3.3% of the budgeted Supplies and Services costs to provide funding for unplanned expenses.

Wastewater Treatment Expense Summary

RECYCLING AND REUSING

At SEJPA we recycle and reuse majority of the wastewater we process. Our recycled water utility protects the environment and makes efficient use of natural resources.

LABORATORY SERVICES

PROGRAM DESCRIPTION

The laboratory located at the San Elijo Water Campus provides analytical services for SEJPA Wastewater and Recycled Water Programs as well as to other entities through contract agreements. The FY 2024-25 contract agreements include the Fairbanks Ranch Community Services District, the Rancho Santa Fe Community Services District, the Santa Fe Valley Community Services District, the Whispering Palms Community Services District, and the San Ysidro Border Patrol Facility, which San Elijo started to service in FY 2022-23.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

Overall, Laboratory Services actual operating expenses are expected to be under budget by \$62,637 or 9.3%. Personnel is under budget due to current vacancies and the use of temporary laboratory employees while vacancies are being filled.

FY 2024-25 RECOMMENDED BUDGET

Total FY 2024-25 recommended budget is \$1,197,738 including \$1,050,738 operating budget and \$147,000 capital appropriations. The operating budget is \$95,662 or 10.0% higher than the prior year budgeted level. Personnel expenses will increase by \$67,419 or 10.0% to reflect inflation. Supplies and Services are planned to increase by \$24,243 or 8.9% due to increases in costs of laboratory supplies and subcontracted laboratory services for analyses requiring specialized equipment. Contingency funding has been set at \$9,000 which is 3.0% of the budgeted Supplies and Services cost to provide funding for unplanned expenses.

OCEAN OUTFALL

PROGRAM DESCRIPTION

This program is the cost center for all operation and maintenance services related to the Ocean Outfall system. These activities include effluent pump station operations and maintenance; ocean monitoring; sampling and testing; and outfall inspection. Outfall capacity is shared through an agreement between SEJPA and the City of Escondido; all operation and maintenance costs are shared based on actual usage (measured by discharged flows). Capital improvement project costs are shared based on leased/owned capacity (79% City of Escondido and 21% SEJPA).

FY 2023-24 ESTIMATED ACTUAL EXPENSE

Ocean Outfall's actual operating expenses are expected to be under budget by \$177,754 or 15.7% due to engineering services related to asset management of the Escondido regulator structure anticipated to be completed next fiscal year.

FY 2024-25 RECOMMENDED BUDGET

Total FY 2024-25 recommended budget is \$1,216,306 including \$1,070,306 operating budget and \$146,000 capital appropriations. The recommended operating budget is \$39,075 or 3.8% more than the previous year. Personnel costs are expected to increase \$73,191 or 13.7% to reflect inflation to labor related costs. Supplies and Services are expected to decrease \$34,116 or 7.2%, due to a reduced need for engineering services. Contingency funding remains at \$25,000, which is approximately 5.7% of the budgeted Supplies and Services costs. This provides funding for unforeseen events or repairs for facilities within the Ocean Outfall Program.

INSPECTING ASSETS

The San Elijo Ocean Outfall extends 8,000 feet from the shoreline at an end depth of 150 feet below sea level. In 2022, the Outfall Plume Tracking Study was completed. The resulting report confirmed historical findings that the aquatic life and environment are not being impacted by ocean discharge from San Elijo Ocean Outfall. Data showed the outfall was in excellent condition and marine life in the area was thriving.

Ocean Outfall Expense Summary

Expense	Actual 2021-22		Actual 2022-23		Estimated Actual 2023-24		Adopted Budget 2023-24		commended Budget 2024-25

CARDIFF SANITARY DIVISION PUMP STATIONS

PROGRAM DESCRIPTION

Under this program, SEJPA provides pump station operation and maintenance services to the City of Encinitas' Cardiff Sanitary Division (CSD). These facilities include the Cardiff, Coast Highway, and Olivenhain Pump Stations. The actual costs incurred are borne solely by the CSD.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

The CSD Pump Stations actual operating expenses are expected to be \$33,705 under budget, or 9.0%. Personnel and Supplies and Services expenses are both estimated to be slightly under budget.

FY 2024-25 RECOMMENDED BUDGET

Total FY 2024-25 recommended budget is \$530,554 including \$405,554 operating budget and \$125,000 capital appropriations. The operating budget is to increase by \$29,385 or 7.8%, which is primarily attributable to Personnel expenses increasing as a result of labor-related cost inflation and current work demands. Contingency funding has been set at \$17,500, which is approximately 10% of budgeted Supplies and Services costs. This provides funding for unforeseen events and repairs at any of the CSD Pump Stations. This year funding for a new Facility Plan Update is being added to this budget.

ENCINITAS SANITARY DIVISION PUMP STATION

PROGRAM DESCRIPTION

Under this program, SEJPA provides pump station operation and maintenance services to the Encinitas Sanitary Division (ESD), for the Moonlight Beach Pump Station, located in the City of Encinitas. The actual costs incurred are borne solely by the ESD.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

It is anticipated that the ESD Pump Station actual operating expenses will be \$9,663 or 5.8% above budget for FY 2023-24. Supplies and Services are expected to be \$22,886 or 32.9% over budget due to unanticipated repair of the overhead crane and replacement of a variable frequency drive for one of the large motors. Contingency funding was used to cover part of the Supplies and Services overage.

FY 2024-25 RECOMMENDED BUDGET

For FY 2024-25, the recommended budget is \$389,448 including \$185,448 operating budget and \$204,000 capital appropriations. The ESD Pump Station operating budget is recommended to be \$17,670 or 10.5% over FY 2023-24 budget. Personnel expenses will increase by \$14,099 or 16.0% due to labor-related cost inflation and current work demands. Supplies and Services will increase by \$3,571 or 5.1% as a result of high utility costs. Contingency funding has been set at \$10,000, which is 13.7% of budgeted Supplies and Services costs. This provides funding for unforeseen events and repairs at the pump station.

CITY OF ENCINITAS URBAN AND STORMWATER SERVICES

PROGRAM DESCRIPTION

Under this program, SEJPA provides stormwater operation and maintenance services to the City of Encinitas. These services include operating the Urban Runoff Treatment Facility, the Phoebe Stormwater Pump Station, and the Storm Drain Sediment Drying and Disposal Program. The Phoebe Stormwater Pump Station and Urban Runoff Treatment Facility provide services to the City of Encinitas Clean Water Program for the protection of local creek, beach, and lagoon water quality. Under the Storm Drain Sediment Drying and Disposal Program, Member Agencies deliver sediment to the San Elijo Water Campus, where the sediment is dewatered, dried, tested, and disposed at a local landfill. This program is designed to comply with current stormwater best management practices and is intended to reduce the overall disposal cost associated with wet sediment. The actual costs incurred are borne solely by the City of Encinitas.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

The City of Encinitas facilities, which includes the Phoebe Stormwater Pump Station, the Urban Runoff Treatment Facility, and the Storm Drain Sediment Drying and Disposal program, are anticipated to end the year \$1,893 or 3.4% below budget, due to Contingency funds not expected to be used.

FY 2024-25 RECOMMENDED BUDGET

The operating budget for these programs is recommended to be \$61,804, which is \$6,290 or 11.3% above the prior fiscal year budget with \$2,010 Contingency funding designated for these programs.

CITY OF SOLANA BEACH PUMP STATIONS

PROGRAM DESCRIPTION

Under this program, SEJPA provides pump station operation and maintenance services to the City of Solana Beach. These facilities include the Eden Gardens, Solana Beach, San Elijo Hills, and Fletcher Cove Pump Stations, Low Flow Diverters located at Fletcher Cove and Seascape Sur, as well as the Storm Drain Sediment Drying and Disposal Program. Under the Storm Drain Sediment Drying and Disposal program, Member Agencies deliver sediment to the San Elijo Water Campus, where the sediment is dewatered, dried, tested, and disposed at a local landfill. This program is designed to comply with current stormwater best management practices and is intended to reduce the overall disposal cost associated with wet sediment. The actual costs incurred are paid for by the City of Solana Beach.

FY 2023-24 ESTIMATED ACTUAL EXPENDITURES

The Solana Beach Pump Stations are expected to be below budget this year by \$17,728 or 3.8%. Personnel expenses are anticipated to be slightly under budget. Supplies and Services will be over budget due to rising fuel costs, property insurance, and permit fees, which will be offset by the Contingency funds.

FY 2024-25 RECOMMENDED BUDGET

Overall, the Solana Beach Pump Stations operating budget is \$538,798 with the expected increase of \$75,524 or 16.3% above the prior year budget. This increase is primarily due to anticipated inflation across labor, utilities, supplies, and services. Personnel budget is projected to increase by \$37,149 or 15.2%. The Supplies and Services category is expected to increase by \$12,375 or 6.2%, as a result of general inflation, increased use of odor control chemicals, and miscellaneous repair parts. Contingency funding is increasing to \$20,000, which is approximately 9.5% of budgeted Supplies and Services costs for the pump stations. This provides funding for unforeseen events and repairs.

CITY OF SOLANA BEACH GENERATOR MAINTENANCE SERVICES

PROGRAM DESCRIPTION

Under this program, SEJPA provides generator maintenance services to the City of Solana Beach. The generators are located at the Solana Beach City Hall and the Lomas Santa Fe Fire Station. The actual costs incurred are borne solely by the City of Solana Beach.

FY 2023-24 ESTIMATED ACTUAL EXPENDITURES

The Solana Beach Generator Maintenance Services are expected to be \$865 or 5.6% under budget. Both Personnel and Supplies and Services are anticipated to be under budget.

FY 2024-25 RECOMMENDED BUDGET

The recommended budget is \$17,556, which is \$2,050 or 13.2% higher than the prior year. This amount reflects the anticipated inflation in maintenance and other services costs. Contingency was added to this program to cover minor unanticipated repairs as these generators age.

CITY OF DEL MAR PUMP STATION

PROGRAM DESCRIPTION

Under this program, SEJPA provides pump station operation and maintenance services that include daily pump station review, after-hours alarm monitoring and emergency response, equipment preventative maintenance, quarterly generator service, PLC programming, instrumentation calibration, wet well cleaning, and disposal of wastewater collection sediment for the City of Del Mar. Any additional pump station services requested by the City of Del Mar are captured in this program. Costs incurred though this program are borne solely by the City of Del Mar.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

The program is forecast to be under budget by \$5,565 or 8.4% mainly due to unspent Contingency funding of \$2,000. Both Personnel and Supplies and Services are anticipated to be slightly under budget.

FY 2024-25 RECOMMENDED BUDGET

The budget for FY 2024-25 is increasing by \$34,589 or 52.1% to \$100,981. This increase is primarily a result of the additional capital appropriations for the Facility Plan Update. The Supplies and Services category is increasing \$3,467, which is predominately due to increasing maintenance needs.

22ND DISTRICT AGRICULTURAL ASSOCIATION (DEL MAR FAIRGROUNDS)

PROGRAM DESCRIPTION

This program was developed in FY 2022-23 to support the Del Mar Fairgrounds with their infield stormwater and urban runoff treatment system. SEJPA staff will conduct weekly treatment system and pump station review, after-hours alarm monitoring and emergency response, equipment preventative maintenance, PLC programming, instrumentation calibration, and rotating drum filter maintenance. Any additional services requested by the Fairgrounds Staff are captured in this program. Costs incurred though this program are borne solely by the Del Mar Fairgrounds.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

This program is expected to end the year over budget by \$24,552 or 17.9%, due to additional services that were requested by Del Mar Fairgrounds after the FY 2023-24 budget was developed. Del Mar Fairgrounds has provided funding for these additional expenses.

FY 2024-25 RECOMMENDED BUDGET

The budget for FY 2024-25 is \$172,371 which is \$35,417 or 25.9% higher than last year due to general inflation and the request for additional maintenance services.

Del Mar Fairgrounds Expense Summary

LEUCADIA WASTEWATER DISTRICT (LWD) TECHNICAL SUPPORT SERVICES

PROGRAM DESCRIPTION

This program supports the Leucadia Wastewater District (LWD) with technical support and operation services for the Forest R. Gafner Water Reclamation Facility (Gafner Facility). Costs incurred though this program are borne solely by LWD.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

This program is expected to be \$7,800 or 34.2% over budget, due to additional Cross Connection Testing Services at Omni Golf Course requested by LWD after the FY 2023-24 budget was developed. Leucadia Wastewater District has provided funding for these additional services.

FY 2024-25 RECOMMENDED BUDGET

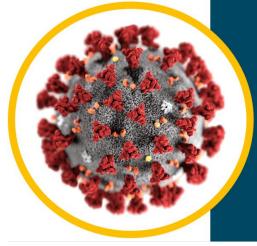

The budget for FY 2024-25 is \$28,209, where 98.2% of the operating expenses come from personnel and the remaining 1.8% is allocated for permit expenses.

TRACKING COVID-19

SEJPA participates in tracking of COVID-19 by analyzing wastewater. Known as "sewer surveillance" or "wastewater epidemiology," technicians testing for coronavirus RNA can predict whether infections will rise or fall. Unlike other types of tracking, wastewater surveillance does not depend on data patients provide to the healthcare system or the availability of COVID-19 testing.

https://biobot.io/data/

RECYCLED WATER

PROGRAM DESCRIPTION

SEJPA owns and operates a recycled water utility which wholesales recycled water to Santa Fe Irrigation District (SFID), San Dieguito Water District (SDWD), City of Del Mar, and Olivenhain Municipal Water District (OMWD), and includes a direct sales agreement with Encinitas Ranch Golf Authority (ERGA). SEJPA financed, permitted, and constructed the recycled water utility, which became operational in September 2000. Since the addition of the Advanced Water Purification (AWP) system in 2013, SEJPA's Recycled Water program delivers up to 3 million gallons per day or nearly 2,000 acre-feet per year (AFY) of recycled water. Local customers that use the recycled water for landscape irrigation include the Encinitas Ranch Golf Course, Lomas Santa Fe Executive and Country Club Golf Courses, Magdalena Ecke Family YMCA, Del Mar Fairgrounds, Village Park greenbelt, local schools, parks, businesses, and street/freeway landscape. Industrial use customers include Scripps Hospital, the Del Mar Fairgrounds, and the San Elijo Water Campus. FY 2024-25 begins the 24th year of operation for the Recycled Water program.

FY 2023-24 ESTIMATED ACTUAL EXPENSE

Recycled Water program's estimated operating expenditures are projected to be under budget by \$196,621 or 7.2%. Supplies and Services are under budget primarily due to reduced chemical use and unspent retrofit expenses. Capital Outlay is over budget by \$67,714, which is predominantly due to the purchase of surge control valves used to dampen transient pressure waves that were identified in certain sections of the distribution system. Savings from other categories will be used to offset the Capital Outlay overage.

FY 2024-25 RECOMMENDED BUDGET

For FY 2024-25, the recommended budget is \$5,343,326 including \$2,633,685 operating budget, \$1,728,000 capital appropriations, and \$981,641 debt services budget. The Recycled Water operating budget decreased by \$86,447 or 3.2%. Personnel costs have increased by \$107,997 or 11.4% to reflect inflation to personnel and current work demands. Supplies and Services are estimated to decrease by \$194,443 or 11.9% primarily due to the reduction of the retrofit expenses and certain chemical costs. Capital Outlay is set at \$40,000 for planned equipment replacement. Contingency funding has been set at \$50,000 or 3.4% of Supplies and Services costs to provide funding for unanticipated expenses.

EVERY DROP COUNTS

To help keep our communities green, SEJPA provides recycled water to schools, parks, businesses, homeowners associations, and golf courses for irrigation. This conserves local water supplies and limits our dependencies on imported water.

BEAUTIFYING COMMUNITIES

SEJPA's recycled water brings landscapes to life throughout Encinitas, Solana Beach, and Del Mar. The Coastal Rail Trail, irrigated with recycled water, wanders through colorful displays of drought-tolerant plants.

Expense detail continued on next page.

CAPITAL PROGRAMS

CAPITAL IMPROVEMENT PROGRAM OVERVIEW

SEJPA's Capital Improvement Program (CIP) prioritizes environmental protection, fiscal responsibility, and community benefits including the safety of our staff and the public when developing and ranking agency infrastructure needs. We strive to replace aging assets prior to failure or significant decline in service performance and invest in energy efficiency and sustainable practices. Over the last five years, significant capital projects included:

- Upgrading pretreatment systems to improve performance during intense storms, increase operational efficiency, and allow the capture and reuse of stormwater;
- Expanding our recycled water system to decrease reliance on imported water and improve local sustainability;
- Replacing the land portion of the ocean outfall system to ensure treated flows safely reach the ocean;
- Modernizing the Water Campus to meet the needs of our agency, improve public access, and provide beneficial amenities to the communities we serve;
- Upgrades to SEJPA's Supervisory, Control, and Data Acquisition (SCADA) system and operator control space; and
- Building 600 kW photovoltaic solar energy system to meet up to 25% of the water campus power needs with renewable energy.

SEJPA is responsible for maintaining permit compliance with regulatory agencies and legal agreements with customers to provide wastewater, recycled water, and clean water services. Proactive asset management and capital improvement planning are critical components in keeping these commitments. SEJPA employs a "triple-bottom line" approach to prioritize and weight projects to compare each project against the other and confirm SEJPA achieves balanced, value-added results for environmental, financial, and social goals.

ENVIRONMENTAL 35%

Meet permit requirements and minimize risk of violations. Seek sustainable and efficient operational practices, maximize resource recovery, and minimize impacts to the environment.

FINANCIAL

Implement economicallyfeasible projects and solutions. Maximize economic benefits for customers through costeffective operations.

Maintain a high standard of worker safety and maximize community benefits through improved aesthetics and recreational uses.

In 2017, SEJPA secured \$23.9 million in a bond offering. Staff bundled the projects into four phases to prioritize capital spending, streamline project delivery, minimize community impacts, and reduce cost through economies of scale. The highest priority projects went into construction in 2017. The first two phases of the capital plan have been completed and the third phase (Biosolids Dewatering Facilities Improvement and MS-2 Replacement) is entering construction. Completed Phases 1 and 2, and ongoing Phase 3 are estimated to cost \$49.7 million. The figure below presents the first three phases of the Capital Program.

SEJPA is executing the 3-Year Capital Plan, consisting of the carryover Phase 3 Project (Biosolids Dewatering Facility and MS-2 Replacement), five new capital improvement projects and a backlog of miscellaneous projects. The current Capital Plan has an estimated cost of \$32.6 million. Project descriptions and funding appropriations are further discussed below. In FY 2024-25, SEJPA will also be updating its Facility Plan to identify, prioritize, and plan for the next generation of investments in the San Elijo Water Campus and remote facilities operated and maintained by SEJPA. Future projects will maintain and improve infrastructure related to wastewater treatment, laboratory services, ocean outfall, wastewater pump stations, and recycled water including expanded nonpotable service and foundational improvements to support Potable Reuse in the future.

CAPITAL PROGRAM FUNDING SUMMARY

The Capital Program is funded through a combination of sources with costs allocated to programs based on infrastructure benefits and in accordance with the capacity share owned/leased by contributing agencies. Funding sources include:

- Annual capital contributions from customer agencies for shared facilities (i.e., Wastewater Program, Ocean Outfall Program, Laboratory Program);
- Annual capital contributions by specific customer agencies for special projects undertaken by SEJPA (i.e., Pump Station upgrades);
- Recycled Water Revenues (recycled water sales and incentive programs) that fund the recycled water reserve, a portion of which is designated for recycled water capital improvements;
- Financing including bond measures and private loans; and
- Grants from State of California and the United States Federal Government.

SEJPA has been awarded multiple grants totaling up to \$6 million through the Integrated Regional Water Management (IRWM) program under Proposition 1 (California Water Bond) and from the US Bureau of Reclamation Title XVI Program to fund the following qualified projects. This grant funding offsets approximately 1/3 of the total estimated project costs for these qualified projects.

	for runding Under State and reder	al Grant Programs
Capital Project	Summary	Benefiting Program(s)
Wanket Tank and Pipeline (two separate construction contracts)	Refurbishment and retrofit of pre-existing 3 million gallon tank; pipeline connecting tank to SEJPA's north distribution system.	Recycled Water
Biological Treatment Improvements	Converts existing conventional activated sludge biological process to Nitrification/Denitrification and upgrades and retrofit of recycled water disinfection (Chlorine Contact Tank). Improves reliability and resiliency of secondary process that produces source water to recycled water system; mitigates risk of future nutrient limits for ocean discharge; positions SEJPA for potable reuse in the future.	Recycled Water, Wastewater, Ocean Outfall
Stormwater Capture and Reuse	Rehabilitation and upgrades to headworks; accomodates stormwater diversion; Construction Completed 2019. Diverts stormwater from regional storm channel and within the San Elijo Water Campus to the headworks to reduce pollutant loading to San Elijo Lagoon, manage runoff and erosion at SEWC, and augment recycled water supply.	Recycled Water, Wastewater

Projects Approved for Funding Under State and Federal Grant Programs

CAPITAL PROGRAM PROJECT APPROPRIATION SUMMARY

The Capital Program is organized by SEJPA service programs, as expenses are incurred through those programs and the respective member and customer agencies fund the capital projects. Details of the capital projects are presented in the following subsections. Where projects benefit multiple programs, costs are shared proportionally. Below is a table listing the appropriations for FY 2024-25.

Program			Fiscal Year 2022-23		iscal Year 2023-24	 Recommended Budget 2024-25	
Wastewater Treatment	\$ 1,240,000	\$	1,260,000	\$	1,225,000	\$ 1,265,000	
Laboratory Services	-		120,000		120,000	147,000	
Ocean Outfall	120,000		175,000		100,000	146,000	
Cardiff Sanitary Division Pump Stations	-		-		75,000	125,000	
Encinitas Sanitary Division Pump Station	375,000		1,125,000		600,000	204,000	
City of Solana Beach Pump Stations	-		-		-	26,000	
City of Del Mar Pump Station	-		-		-	25,000	
Recycled Water	500,000		500,000		4,450,000	1,728,000	
Total Capital Appropriations	\$ 2,235,000	\$	3,180,000	\$	6,570,000	\$ 3,666,000	

WASTEWATER TREATMENT PROJECT APPROPRIATION DETAIL

Capital Project	-	Fiscal Year Fiscal Year 2021-22 2022-23		 Fiscal Year 2023-24		commended Budget 2024-25	
Biosolids Dewatering (Phase 3)	\$	1,040,000	\$	1,060,000	\$ -	\$	-
Miscellaneous Projects		200,000		200,000	350,000		313,000
Stormwater Capture and Reuse		-		-	350,000		-
Biological Treatment Improvements (NDN & CCT)		-		-	525,000		725,000
Facility Plan Update		-		-	-		227,000
Total Capital Appropriations	\$	1,240,000	\$	1,260,000	\$ 1,225,000	\$	1,265,000

PHASE 3 – BIOSOLIDS DEWATERING FACILITIES IMPROVEMENT (AND MS-2 REPLACEMENT) PROJECT

The Biosolids Dewatering Facilities Improvements and MS-2 Replacement Project was bid and awarded in January 2023. Construction completion is extending due to persistent supply constraints in the construction industry, in particular manufacturing of electrical equipment. Construction is now expected to be complete in mid- to late-2025. The estimated value of the Biosolids Dewatering and MS-2 Replacement Project is \$12.1 million, including capitalized soft costs (i.e., engineering, design, bidding services, legal, and SEJPA staff). The project will replace the dewatering belt-presses with new centrifuges, rehabilitate and replace corroded steel and sludge handling equipment, replace chemical storage and pumping equipment, and other related improvements. During final design, Main Switchboard No. 2 (MS-2) was determined to be at the end of its service life and reaching obsolescence – it will also be replaced and upsized with this Project. The entire \$12.1 million estimated project cost is funded from wastewater capital contributions received in prior years.

PHASE 4 – BIOLOGICAL TREATMENT IMPROVEMENTS

The Biological Treatment Improvements Project consists of two main components: (1) converting the secondary treatment system to a more robust nitrification/denitrification (NDN) process to remove nutrients, and (2) retrofit and rerating of the chlorine contact tank (CCT). The Wastewater Program will share the cost of the NDN upgrades with the Recycled Water Program, as this improvement will produce more reliable and higher quality effluent that benefits both wastewater treatment/disposal and recycled water production. The second component, retrofitting and rerating the CCT will be borne solely by the Recycled Water Program. The improved biological treatment preemptively prepares for anticipated nutrient limits on ocean outfall flows and will provide more robust treatment to allow the secondary process to better handle the increasingly variable wastewater strength and hydraulic loading experienced in recent years at the SEWC. The project is estimated to cost \$10 million, and SEJPA anticipates this project being eligible for a federal grant on the order of \$2.5 million under a federal program for expanding recycled water production. The Project will be financed with a private placement loan of approximately \$10 million through the Recycled Water Program to smooth cash flow, as the grant funding will likely be received after the project is completed and to reduce the burden on wastewater funds. The Wastewater Program's share of the overall project is budgeted at \$3 million plus project delivery support costs (estimated at \$0.15 million) and will be collected over a five-year period in accordance with the following schedule:

Schedule of Wastewater Program Contributions to Biological Treatment Improvements											
Fiscal Year	Capital Contribution from Wastewater Program	Status									
2023-24	\$ 525,000	Collected									
2024-25	725,000	Budgeted									
2025-26	725,000	Projected									
2026-27	725,000	Projected									
2027-28	450,000	Projected									
Total Contributions	\$ 3,150,000	Estimated									

PHASE 4 – STORMWATER CAPTURE AND REUSE

The SEJPA Stormwater Capture and Reuse Project will reduce pollution to the San Elijo Lagoon and Pacific Ocean and capture stormwater to augment water supply to the recycled water system. The project will also improve site drainage to manage runoff and align with industrial stormwater permit requirements. The project, scheduled to start construction in FY 2024-25, will include stormwater interceptors, desilting basins, up to two pump stations and other ancillary equipment to capture and treat approximately 7 million gallons per year. The project budget is \$2 million, plus project delivery support costs (estimated at \$0.1 million) and is expected to be funded primarily by grant funding, estimated at up to \$1.4 million.

The cost of this Project which benefits the entire Water Campus will be shared between the Recycled Water Program and Wastewater Program. The Wastewater Program's portion is budgeted at \$0.35 million (net of grant funding) and was collected in FY 2023-24.

MISCELLANEOUS PROJECTS

SEJPA continuously assesses its assets and implements capital projects to maximize equipment useful service life, enhance process automation, address safety issues, and improve treatment quality. Small projects are prioritized and implemented on an as-needed basis, based on capital cash availability and in-house project oversight capacity. Historically, SEJPA has also budgeted for Capital Outlays within the Operating Budget; however, starting with the FY 2024-25 Budget, capital expenses will be budgeted entirely within the Capital Program. Miscellaneous Projects including asset renewal and replacement is estimated to total over \$2 million over the next five years. Capital contributions on the order of \$0.3 million to \$0.4 million will be budgeted annually to fund the capital reserve for these projects under a pay-go capital project implementation strategy.

Examples of miscellaneous and asset management projects at the San Elijo Water Campus include rehabilitating Dissolved Air Floatation Thickener (DAFT) #1 (note, DAFT#2 was rehabilitated in FY 2022-23), modifications to headworks channel cover plate system to address identified safety concerns, large pump replacements and rebuilds, and implementing biogas treatment to protect low-emission boilers and flares. SEJPA is budgeting \$0.313 million in FY 2024-25 for miscellaneous capital projects.

FACILITY PLAN UPDATE

SEJPA will be updating the Facility Plan which is the foundational document for SEJPA's capital program. The planning effort will commence in Summer 2024 and continue into the Fall 2025. The facility planning effort will include a review of pertinent regulations and condition assessment of existing assets both at the San Elijo Water Campus and at 13 remote facilities. The updated planning document will provide recommendations for prioritized capital projects over the next decade. Each of SEJPA operating "program(s)" will be responsible for contributing its share of the facility plan update effort. The Wastewater Program's share is estimated at \$227,000 and is budgeted in the FY 2024-25 capital budget.

Capital Project	al Year 21-22	 scal Year 022-23	 scal Year 023-24	I	ommended Budget 024-25
Laboratory Remodel	\$ -	\$ 120,000	\$ 120,000	\$	125,000
Facility Plan Update	-	-	-		22,000
Total Capital Appropriations	\$ -	\$ 120,000	\$ 120,000	\$	147,000

LABORATORY SERVICES PROJECT APPROPRIATION DETAIL

The current laboratory casework has been in use for more than 30 years and has significant signs of corrosion and deterioration. Although the building code has no significant requirements on corroding surfaces, the laboratory casework, counters, furniture, and ventilation equipment has been recommended for replacement due to age and increased maintenance requirements. In preparation for a laboratory remodeling project, in FY 2022-23 SEJPA began collecting cash contributions for a forthcoming laboratory refurbishment project. In FY 2022-23 and FY 2023-24, SEJPA collected installments of \$120,000 for a total of \$240,000 to date. For FY 2024-25, SEJPA is budgeting a third installment of \$125,000. SEJPA has retained an architect to conduct a condition assessment, needs analysis, and to develop a scope and budget for the Project; recommendations will be incorporated into the Facility Plan Update. The Laboratory Program will also contribute \$22,000 to the Facility Plan Update.

OCEAN OUTFALL PROJECT APPROPRIATION DETAIL

Capital Project	Fiscal Year 2021-22		Fiscal Year 2022-23		Fiscal Year 2023-24		Recommended Budget 2024-25	
Outfall Reserve	\$	120,000	\$	25,000	\$	50,000	\$	50,000
Escondido Vault Rehabilitation		-		150,000		50,000		50,000
Facility Plan Update		-		-		-		46,000
Total Capital Appropriations	\$	120,000	\$	175,000	\$	100,000	\$	146,000

OUTFALL RESERVE

The San Elijo Ocean Outfall system is critical regional infrastructure that serves SEJPA and the City of Escondido. This infrastructure includes pressure regulating and isolation valves, ocean discharge pumps, flow measuring meters, 2,600 feet of land outfall pipeline, 8,000 feet of ocean outfall pipe, system automation and monitoring components, and support structures and rock ballast that hold the outfall stationary on the ocean floor. The outfall conveys an average of approximately 10 million gallons per day (MGD) with peak flows during storm events of up to 25.5 MGD. The Outfall Reserve is a capital reserve account dedicated for repair and replacement activities associated with the San Elijo Ocean Outfall generally requires replenishment every 15-20 years. Re-ballasting and diffuser maintenance was completed most recently in 2006 – a comparable scope is anticipated to cost over \$4 million today (in 2024 dollars). SEJPA completed an inspection of the outfall in 2021 that found the ballast rock was adequately supporting the outfall; however, ballast rock can be affected by a single significant ocean swell. The Outfall Reserve balance totals approximately \$1.61 million. Collecting reserve funding over time helps smooth the rates while building up funds required to complete the work when it becomes necessary.

ESCONDIDO VAULT REHABILITATION PROJECT

As part of the Ocean Outfall system, SEJPA operates and maintains flow metering and water quality monitoring equipment inside a below-ground, concrete structure on Manchester Avenue near the Water Campus driveway. The vault was initially installed in 1974 and modified in 1999 to include a second flow meter. The original 1974 flow meter and valves have reached the end of useful life, and this project will replace old and outdated equipment in the vault. SEJPA will evaluate the condition of the vault and equipment through the Facility Plan update. SEJPA received \$150,000 in capital contributions for this project in FY 2022-23 and a second installment of \$50,000 in FY 2024-25 for a total of \$200,000 in reserve to implement the project.

EFFLUENT PUMP STATION

As part of the Ocean Outfall system, SEJPA operates and maintains the Effluent Pump Station at the San Elijo Water Campus. The pump station was initially installed in 1974 with the extension of the Ocean Outfall. The original 1974 equipment is nearing the end of its useful life, and a project is anticipated to replace old and outdated equipment, upgrade electrical and control components and rehabilitate the structure. SEJPA will evaluate the condition of the Effluent Pump Station through the Facility Plan update.

The Ocean Outfall Program will contribute \$46,000 to the Facility Plan Update to assess and define projects to rehabilitate and upgrade the Escondido Vault and the Effluent Pump Station. Recommendations for rehab and upgrades will be the basis for future capital improvement projects.

Capital Project	 al Year 21-22	 al Year 22-23	 cal Year 023-24	Recommended Budget 2024-25

Total Capital Appropriations	\$ -	\$ -	\$ 75,000	\$	125,000	

CARDIFF SANITARY DIVISION PUMP STATIONS APPROPRIATION DETAIL

OLIVENHAIN PUMP STATION INLET GATE REPLACEMENT

The wet well inlet gate to the Olivenhain Pump Station is inoperable and needs to be replaced. This gate is critical for isolating flow to allow SEJPA and City of Encinitas staff to safely maintain and clean the wet well structure. In particular, high sediment and rock loads carried from the tributary collection systems to this pump station requires regular cleaning. The gate replacement will require temporary upstream diversion and special construction methods to safely access and work within the confined space. SEJPA will prepare a small project bid solicitation to retain a contractor to support the installation of the inlet gate. SEJPA collected \$75,000 for this gate replacement project in FY 2023-24 and is budgeting a second installment of \$100,000 for FY 2024-25.

Cardiff Sanitary Division will contribute \$25,000 to the Facility Plan Update, for assessment of its three sewer pump stations. Recommendations for rehab and upgrades will be the basis for future capital improvement projects.

Capital Project	Fiscal Year Fiscal Yea 2021-22 2022-23						Recommended Budget 2024-25

ENCINITAS SANITARY DIVISION PUMP STATION APPROPRIATION DETAIL

MOONLIGHT BEACH PUMP STATION REHABILITATION

PHASE 4 – MOONLIGHT BEACH PUMP STATION REHABILITATION

The Moonlight Beach Pump Station was originally constructed in 1974 and underwent significant renovation in 2006. It is located on the southeast corner of the intersection of 3rd Street and B Street in the City of Encinitas. A pump/grinder replacement evaluation for this pump station was conducted and the findings are detailed in the September 2019 Moonlight Beach Pump Station, Pump Replacement Evaluation. Design of this project began in FY 2021-22 with the initial \$375,000 payment from the City of Encinitas. As the design progressed, additional issues not anticipated in the initial 2019 report were identified and incorporated into the project including wet well access safety issues, replacement of inoperable valves, and replacement of flow meter that has reached the end of its service life. SEJPA is carefully monitoring the impact of inflation on construction cost trends and conferring with engineers and contractors. The cost for this Project is now estimated at \$2.3 million, including project delivery costs (estimated at \$0.1 million), of which the City of Encinitas has funded \$2.1 million over the past four years. The unfunded amount of \$0.2 million is budgeted for FY 2024-25. The project is funded solely by the City of Encinitas and is included in the revenues collected from the City.

The Encinitas Sanitary Division will also contribute \$4,000 to the Facility Plan Update for the assessment of the Moonlight Beach Pump Station, with emphasis on facility assets that are not part of the ongoing rehabilitation project, for example the electrical system and SCADA communications. Recommendations for rehab and upgrades will be the basis for future capital improvement projects.

CITY OF SOLANA BEACH PUMP STATIONS PROJECT APPROPRIATION DETAIL

Capital Project	Fiscal Year 2021-22		Fiscal Year 2022-23		Fiscal Year 2023-24		Recommended Budget 2024-25	
Facility Plan Update	\$	-	\$	-	\$	-	\$	26,000
Total Capital Appropriations	\$	-	\$	-	\$	-	\$	26,000

SEJPA is not anticipating any capital improvements in the Solana Beach Sanitation Division, Pump Station Program for FY 2024-25. However, the City of Solana Beach will contribute \$26,000 to the Facility Plan Update for the assessment of its four wastewater pump stations. Recommendations for rehab and upgrades will be the basis for future capital improvement projects.

RECYCLED WATER PROJECT APPROPRIATION DETAIL

Working collaboratively with its water district partners, SEJPA plans and constructs improvements to the recycled water infrastructure to maintain service reliability, improve operational efficiency, and enhance service capabilities.

SEJPA's 3-Year Capital Plan, consisting of six large capital improvement projects and a backlog of miscellaneous projects has an estimated capital cost of \$32.6 million, of which \$13.5 million is attributed to the Recycled Water Program. Significant grant funding, in the order of \$6 million, will reduce the burden on the Recycled Water Program. SEJPA's funding strategy includes a private placement loan of approximately \$10 million to smooth cashflow requirements. The Wastewater Program will reimburse the Recycled Water Program for its share of the NDN conversion and stormwater site improvements across the Water Campus through annual contributions totaling \$3.85 million, starting in FY 2023-24. Project descriptions and funding appropriations are further discussed below. In FY 2024-25, SEJPA will also be updating its Facility Plan to identify, prioritize, and plan for the next generation of investments in the San Elijo Water Campus and remote facilities operated and maintained by SEJPA. Future projects will maintain and improve infrastructure related to wastewater treatment, laboratory services, ocean outfall, wastewater pump stations, and recycled water including expanded non-potable service and foundational improvements to support Potable Reuse in the future.

The following Treatment, Conveyance, and Storage projects have been identified as Phase 4 projects:

WANKET TANK REFURBISHMENT AND PIPELINE

This project will convert the Wanket Tank, an existing 3-million-gallon pre-stressed concrete potable water tank that has been out of service for about a decade, into a recycled water storage tank. The Wanket Tank, constructed in 1975, is jointly owned by Olivenhain Municipal Water District (OMWD) and San Dieguito Water District (SDWD) and is no longer used for potable water service. Wanket Tank is located on a 1.67-acre site approximately 1,000 ft east of the nearest existing SEJPA recycled water line in Quail Gardens Drive. The project will include rehabilitating the concrete reservoir, disconnecting the tank from potable water system in Quail Gardens Drive, and ancillary improvements. This project will substantially increase recycled water storage, improving service reliability, operational efficiency, and water pressure for customers. SEJPA is carefully monitoring impacts of inflation on construction cost trends and conferring with engineers and contractors; project scope was refined in 2023 to align project goals with available funding. The cost for this project is now budgeted at \$3.1 million, plus project delivery costs (estimated at \$0.11 million), and has qualified for approximately \$1.6 million in state and federal grant funding. The remaining project cost of approximately \$1.6 million is proposed to be funded by the Recycled Water Fund.

STORMWATER CAPTURE AND REUSE

The SEJPA Stormwater Capture and Reuse project is intended to reduce pollution to the San Elijo Lagoon and Pacific Ocean and capture stormwater to augment water supply to the recycled water system. The project will also improve site drainage to manage runoff and align with industrial stormwater permit requirements. The project is envisioned to include stormwater interceptor, desilting basins, up to two pump stations and other ancillary equipment to capture and recycle approximately 7 million gallons per year. The project budget is \$2 million, plus project delivery support costs and is expected to be funded primarily by grant funding, estimated at up to \$1.4 million. This project includes elements not completed with the Water Campus Improvement project and will be designed and constructed over the next two years.

The cost of this Project, which benefits the entire Water Campus, will be shared between the Recycled Water Program and Wastewater Program. The Recycled Water Program portion is \$0.35 million (net of grant funding). The Wastewater Program's portion, budgeted at \$0.35 million (net of grant funding) was collected in FY 2023-24.

BIOLOGICAL TREATMENT IMPROVEMENTS (NDN & CCT)

The Biological Treatment Improvements Project consists of two main components: (1) converting the secondary treatment system to a more robust nitrification/denitrification (NDN) process to remove nutrients, and (2) retrofit and rerating of the chlorine contact tank (CCT). The Recycled Water Program will share the cost of the NDN upgrades with the Wastewater Program, as this improvement will produce more reliable and higher quality effluent that benefits both wastewater treatment/disposal and recycled water production. The second component, retrofitting and rerating the CCT, will be borne solely by the Recycled Water Program. The improved biological treatment will allow the secondary process to better handle variable wastewater strength and hydraulic loading, providing more consistent water quality to the tertiary process which will allow the sand and membrane filters to operate more efficiently, and utilize less chemicals. The longer solids retention time utilized in the NDN process will be less susceptible to process upsets and will yield fewer colloidal particles that are believed to be contributing to occasional coliform breakthrough in the sand filters. Furthermore, with a fully nitrified effluent (no residual ammonia), the CCT can be rerated using free chlorine which will allow the tank to be rerated from 3 mgd to 4 mgd and it will also allow a portion of the existing structure volume to be repurposed for onsite storage, which will alleviate operational challenges on the recycled water pump station. The total project is estimated to cost \$10 million, plus project delivery support services (estimated at \$0.5 million), and SEJPA anticipates this project being eligible for a federal grant on the order of \$2.5 million. The Recycled Water Program's share of the overall project is budgeted at \$7.4 million. The Wastewater Program will reimburse the Recycled Water Program for its share of the NDN improvements through annual capital contributions starting in FY 2023-24 (See Wastewater Treatment Project Appropriation Detail Section, above, for projected capital contribution schedule).

DEBT SERVICE

WASTEWATER TREATMENT DEBT SERVICE

2017 CLEAN WATER REVENUE BONDS

SEJPA issued revenue bonds in July 2017 to fund a series of wastewater, ocean outfall, and recycled water projects. The bond included a face value of \$22.115 million, plus a premium less expense of \$1.797 million netting \$23.912 million received with a true interest cost of 3.39% over 30 years. The FY 2024-25 payments will include both interest and principal: \$414,288 interest and \$255,000 principal for each Member Agency. The estimated balance as of June 30, 2024, will be \$18,956,425. The scheduled payoff date is March 2047.

SAN DIEGO GAS & ELECTRIC ON BILL FINANCING

In July 2017, SEJPA and San Diego Gas & Electric (SDG&E) entered into an On-Bill Financing Loan Agreement to fund the Blower Replacement Project. This project replaced three 125-hp multi-stage centrifugal blowers that were installed in 1991 with substantially more efficient turbo blowers. This replacement project resulted in a \$533,883 loan from SDG&E with 120 monthly payments of \$4,449 with no interest. The resulting annual cost savings from the installation of more energy-efficient equipment roughly equals the annual finance expense. The estimated balance as of June 30, 2024, will be \$160,164. The scheduled payoff date is July 2027.

ENCOURAGING INNOVATION

SEJPA supports efficiency and innovation. Solar power provides electricity at the Water Campus. Visitors can charge electric vehicles at public charging stations. Our policies protect the environment and advance the goals of climate action plans.

RECYCLED WATER DEBT SERVICE

2023 RECYCLED WATER LOAN

SEJPA has secured a private placement loan in the amount of \$10,120,000 to fund Recycled Water Capital Improvements. The loan has a 4.58% fixed interest rate for a term of 20 years with annual payments ranging from \$778,028 to \$779,039. Debt service on the loan will be paid through recycled water rates.

ADVANCED WATER PURIFICATION LOAN

In November 2011, SEJPA received a private placement loan for the construction of the Advanced Water Purification Facility in the amount of \$2 million at a fixed interest rate of 4.15%. Annual payments of \$148,154 began in 2011 and will continue for 20 years until 2031. The outstanding principal balance on June 30, 2024, is estimated to be \$942,083.

SFID PIPELINE LOAN

In 2013, SEJPA entered into an agreement with the Santa Fe Irrigation District to purchase a recycled water distribution pipeline for \$526,149 with an initial down payment of \$50,000 and annual interest between 1.0% and 2.5% based on the Local Agency Investment Fund (LAIF) rate. The repayment schedule is \$450 per acre foot of water delivered through the pipeline. The outstanding principal balance as of June 30, 2024, is estimated to be \$322,822. Payment amount is based on 90 acre-feet delivered through the pipeline in FY 2023-24.

SOLANA BEACH PIPELINE LOAN

In 2020, SEJPA entered into an agreement with the City of Solana Beach to purchase a recycled water distribution pipeline for \$1,191,652 with no annual interest and \$478,319 of the reimbursement through water sales. Other sources of funds for reimbursement will be a combination of the cash value of services to be provided by SEJPA and actual grants received. In FY 2022-23, \$600,000 of grant funding was reimbursed to Solana Beach. The repayment schedule is \$450 per acre foot of water delivered through the pipeline. The outstanding principal balance as of June 30, 2024, is estimated to be \$425,834. The payment amount is based on 13 acre-feet delivered through the pipeline in FY 2023-24.
